## KEY PROJECTS

### PORTFOLIO RESPONSIVE WEBSITE

- We designed and developed a Portfolio website from scratch using HTML, CSS, and JavaScript to create a responsive and visually website.
- A Portfolio website that consist personal information like about yourself, about our services etc.
- It is used for client that needs to services as per requirements and they can easily interact with the service provider.

### CLOUD BASED VIDEO STREAMING PLATFORM

- Developed a Cloud Based Video Streaming Platform using HTML/CSS/React and IPFS to Stream Video Lectures.
- We use the IPFS protocol that provides a peer to peer, decentralized and distributed file system and it also provides minimized zero buffered loading to the content of video.
- For storing and retrieving the decentralized data we use WEB3.0 storage, which is a decentralized file system built on the Interplanetary file system(IPFS).
